DETAILED ACTION

Instant Application: 10585659 is a 371 of PCT/EP2004/053685

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I. Claims 1-9 and 13 drawn to liquid formulations of imidoalkanepercarboxylic acids in form of aqueous dispersions.

Group II. Claims 10-11 drawn process of obtaining liquid formulations of imidoalkanepercarboxylic acids.

Group III. Claims 12 and 14 drawn method of use of liquid formulations of imidoalkanepercarboxylic acids.

2. As set forth in Rule 13.1 of the Patent Cooperation Treaty (PCT), "the international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept." Moreover, as stated in PCT

Rule 13.2, "where a group of inventions is claimed in one and the same international application, the requirement of unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features." Furthermore, Rule 13.2 defines "special technical features" as "those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art."

3. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Groups I-III is liquid formulations of imidoalkanepercarboxylic acids in form of aqueous dispersions. The liquid formulations of imidoalkanepercarboxylic acids in the form of aqueous dispersions do not present a contribution over the prior art. As disclosed in US patent 5391324 (Reinhardt), Date of Patent: Feb. 21, 1995, liquid formulations of imidoalkanepercarboxylic acids drawn to instant claims 1-14 do not involve an inventive step. Reinhardt teaches the preparation of fluid or pasty, storage-stable

peracid suspensions, in particular those based on imido- and ureidoperoxy-carboxylic acids (col.2, lns.28-31). Moreover, a suspension formulated from a peroxy-carboxylic acid, a combination of two nonionic surfactants, and, other additional components (col.2, lns.59-62). As such, Group I does not share a special technical feature over the prior art. The claims are not so linked within the meaning of PCT Rule 13.2 so as to form a single inventive concept, and unity between Groups I-III is broken.

4. The examiner has required restriction between product and method claims. Where applicant elects claims directed to the product, and the product and use claims are subsequently found allowable, withdrawn process and use claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process or use invention must require all the limitations of an allowable product claim for that process or use invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process and use claims will be withdrawn, and the rejoined process and use claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise

proper restriction requirement between product claims, process and use claims may be maintained. Withdrawn process or use claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process and use claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
